Beecher—His Return to His Pulpit.

The New York correspondent of the
St. Louis Republican, thus refers to
the great preacher:

"It was allowed me by some power-
ful scene of the troubles and petti-
nesses that encompass me round
about and elect for myself to become
for a year and a day some man of my
acquaintance, then for 296 days would
I occupy the pantofoles, pulpit and
perquisites of Henry Ward Beecher.

He has altogether the best thing of
any man in these United States. If
he were a woman now, he would be
wiped out of all shape by the late
being put in by malice and jealousy.
Being a man, his popularity is greatly
increased thereby, and his return re-
cently to Plymouth Church was an
ovation. Friday night I saw an audi-
ence of 63 in the Broadway Theatre,
Saturday night 28 persons occupied the
lower part of the Grand Opera House,
but Sunday night 3,000 people waited
the rise of the curtain at Plymouth
Academy. The crowded aisles, at-
tention and the other things indicat-
ing the entrance of a bride party, walked
the rosy, round parson. The rostrum
of the church is large and broad. Lots
of room. Mr. Beecher sang the hymn
with his immense congregation, and
then rising, came up smiling, and as
usual, stopped with one leg over so
much, while the other leg advanced
was putting his best foot foremost and
told a discourse on the parable of the
Prodigal Son.

"Now," said Mr. Beecher, "I'd
rather of Heaven, have been a Jew, a
Prodigal. The other son was a miser-
able creature. There was a good deal
to admire in the Prodigal. He went
off to have a good time, and he had it,
and got through with it. He reached
the ground and made a rebound. He
did not say when in his trouble, 'I'll
go to my father and state the circum-
stances.' He called his performances
miserable, and the other son, who was
and was joyfully forgiven." And here
Mr. Beecher clasped his hands and
raised his eyes, and said, in a very
beautiful way, "Our Father in heaven
mean that the fathers of earth?"

Then, in referring to the other
brother, he described him as hearing
the singing and dancing and refusing
to go in, being "too stingy to go in;
drunk; too cautious; too cold; too un-
sympathetic to sin in any way. He
was mean, stiff and proper, and was
a Heaver to whom you put
Beecher made himself as much like a
mummy and walked as stiff as a ram-
rod across the stage on his road to
Heaven, in the style of the prodigal's
brother.

The assembled three thousand
roared. No matter who the other man
is, H. W. Beecher has the pleasantest
lines of all. Then he finds that multi-
tude of people, and Sunday after
Sunday, ready to laugh or cry at his
magnificent acting dictates. It costs
each person about \$10 a Sunday to hear
him. The cheapest admissions are
about \$1.00. He is a great success
you in an obscure seat for \$1, but will
laud you in the pulpit on a camp chair
for \$5.

All things considered, what a
swell thing it is to be a pet parson.

Study Beneficial to Health.

The London Globe editorially pre-
sents the following: "True study is
an eminently leisurely process, the
great condition of success in it being
that it is always done at a slow
pace. It is not a hurried thing, but
keeps the faculties lively, it seldom ex-
hausts the mind, and it is a healthy
thing. Hence the student of medicine
is less likely to be injured by his study
than the student of law, who is often
supposed—certainly much less
injuriously than many things that are
scarcely reputed injurious at all. The
length of the study is well directed
by the student, and the brain by
study positively gains in vigor by
their rational and orderly sequences.
By the safe advance from step to step,
the nervous system, which is the most
vulnerable part of the body, is kept
in great health with a minimum of fa-
tigue, never lifting the body more

Twenty-four seats in the next Congress will be contested—fifteen by Democrats and nine by Radicals. This, in connection with the proposed investigations, will make things interesting and lively.

Hartman's plurality for Governor of Pennsylvania is 12,000, and that of Rawle, for State Treasurer, 9,735. Hartman's majority in 1872 was 25,000. Democratic gain, 25,000. Figures speak louder than words.

There is no better way, no safer way, no easier way, no surer way, of saving children from the debasing influences of the street, from corrupting associations, and from the acquisition of vicious and hurtful practices, than to make home attractive.

A subscriber asks for the derivation of the word "Bonzanza." It is a Spanish term, and we believe means a favorable breeze, and metaphorically a stroke of good luck. It is used in the mining districts, with reference to rich fields of ore.

There have been 250 Popes since and including St. Peter. But his title was not that of Pope. He was installed as Bishop in the year 33, shortly after the crucifixion. The title of Pope was first assumed in the year 590, by Gregory I., the Great.

The celebrated brick bricks, known in almost every commercial market and house as "brick dust," are manufactured from the deposits of the rivers Parrett, Bridgewater, Somerset, England. As far as known, this peculiar brick or dust has been used in the construction of a steel mill which was laid down seven or eight years ago near the depot in Cleveland, where the wear and tear from the frequent switching of trains is very great, has outlived eighteen men upon the same track which have been from time to time placed opposite to it.

When the air is passed through a hot furnace and heated to a high degree, and then passed into a room, such air should be called baked air, and it is about as bad as a form of lung food can be taken. Nothing but badness, dirtiness, drowsiness and dullness can come from its use.

Why was not Dolan's retirement from the Interior Department followed by a suit to recover public moneys? They managed these things better in Democratic New York. They forced Dolan to resign, and now they are forcing him to disgorge the money stolen from the people.

Rich poverty would appropriately characterize the lives of many who are saved by the multitude. Late Thomas H. Selby, of San Francisco, was supposed to be worth at least a million dollars over and above all liabilities. It now appears that the assets of his estate are far from sufficient to pay his debts.

Spanish trade, notwithstanding internal and external wars, proves remarkably elastic, and shows what the resources of that country would be if properly developed. In 1849 the value of her foreign commerce was \$50,250,000; in 1874 it had grown to \$157,016,050. This increase took place entirely under the monarchial form of government.

In that old Radical State of Iowa a committee appointed by the Governor to investigate the management of the State Reform School has just reported that boys are brutally whipped and almost starved to death, and that Superintendent has drawn \$1,200 for the State on his revenue vouchers \$1,200 for the support of 115 entirely imaginary boys.

The nine National gold banks in the United States are all in California, but there are only eight now—the National Gold Note and True, Company of S. F. having suspended. Their total capital is \$4,700,000, but \$900,000 have been deposited in the U. S. Treasury for the retirement of so much of this note circulation.

Of this sum the Trust Company of San Francisco has deposited \$750,000, the Stockton bank \$170,000 and the Petaluma bank \$40,000.

The report of the Superintendent of Public Printing shows that the total cost of printing, binding and lithographing for the Government for the year ending September 30th, last, was \$1,500,435. The Congressional Record cost \$23,469 additional. Nearly all the printing ordered by the last Congress is completed.

There are now 1,300 employees in all the departments, and the pay roll is \$5,000 a month. The employees get sixty cents per 1,000 tons, or four dollars a day for eight hours.

SOME OF THE FINEST CABINET
ORGANS

EVER BROUGHT TO THIS COAST.
NO MORE REEDY, HARSH TONES.

THE WARREN & CLOUGH
COMBINATION ORGAN.
New and Wonderful Invention.

The newly invented SCHRIEBER PATENT "QUALIFYING TUBES." (Secured by letters patent in the United States, England and Canada.) An invention having a MOST IMPORTANT BEARING on the future reputation of Reed Organs. By means of which the quantity or volume of tone is VERY ABUNDANTLY INCREASED, and the QUALITY of tone rendered equal to that of the best Pipe Organs of the same capacity—thus furnishing all the desirable characteristics of the large Church Pipe Organ, in a case the size of an ordinary Cabinet or Parlor Organ, and at the moderate price of Reed Organs. By means of this invention, an Organ containing two sets of reeds becomes equal in volume and power, and VASTLY SUPERIOR IN QUALITY AND BRILLIANCE OF TONE to an ordinary Reed Organ of six or eight sets of reeds. One of the crowning features of this invention is the peculiar facility with which it adapts the tone of the reeds to the ordinary Cabinet or Parlor Organ, and at the moderate price of Reed Organs.
